- There is no proper financial recorded, since it is a family business. However, the borrowers are still operating business well and profitable from year to year.

8.2	Industry Risks	Low	✓	Medium	High
<p>Government to Push Fish Farming</p> <p>The demand of fish is considered to be high demand as the local and family fish producers is considered to be low skill and high cost, thus the selling price in the market is also considered high. Since the Borrower has more than 10 years' experience and assisted from technical specialist from Vietnam, the market selling price is the competitive advantage for him.</p> <p>The government has set an annual target of producing 1.2 million tons of fish in farms within the next three years to support high local demand and to reduce the flood of imports from neighboring countries, according to the Ministry of Agriculture, Forestry and Fisheries. The market now depends on imported fish from neighboring countries, Mr. Thouk said, and that is costing ordinary people too much. The flood of imported fish in the market has also raised concerns over food safety, with many claiming that imported fish are of poor quality and treated with antibiotics that can affect people's health.</p> <p>"Imported fish feed is one of the big factors which pushes the cost of farming fish," Mr. Sophal said. "Unless the price of feed comes down, fish farmers cannot sell their products at a low price." The demand for fish per person has increased from an estimated 52.5 kilograms per year to 63 kilograms, Mr. Thouk said. The current production of 700,000 tons per year will not be enough to supply the increase in consumption in the coming years, he said.</p> <p>(Source: https://www.khmertimeskh.com/news/28196/government-to-push-fish-farming/)</p> <p>Plastic Waste</p> <p>Southeast Asian nations are taking measures to reduce pollution from plastic waste and promote the recycling of plastic products in keeping with the focus of this year's Earth Day on April 22, but efforts in Vietnam, Laos, Cambodia, and Myanmar are falling short.</p> <p>According to a 2017 article in Science Advances, the worldwide total volume of plastic has reached 8.3 billion tonnes, the equivalent of more than 800,000 Eiffel Towers. Of this enormous amount, 6.3 billion tonnes have been disposed as waste. In Cambodia, according to the ACRA Foundation, around 10 million plastic bags are used in Phnom Penh every day. Urban Cambodians use more than 2,000 plastic bags every year. The biggest problem is that plastic does not biodegrade easily. So it stays around for thousands of years. And slowly, it leaks chemical substances harmful for the environment, animals and people.</p> <p>In April 2018, the Ministry of Environment introduced new regulation for the use of plastic bags. Major supermarkets such as Aeon and Lucky have begun to charge 400 riel (\$0.10) per bag. The Ministry of Environment is also considering plans for jute bags as an alternative, and the school curriculum is being updated to help educate future generations on the harm caused by plastics.</p> <p>Hence, the production of bottle plastic recycling is a main role to cut down the world's pollution from plastic as well.</p>
